

Users of the [Electronic Municipal Market Access \(EMMA®\) website](#) can use a combination of descriptive characteristics about a security to search EMMA's database of more than 1.2 million outstanding municipal securities. EMMA Search helps investors and others locate a specific security on the website or find a list of securities that share certain characteristics.

About EMMA Advanced Search

The best way to locate a specific security on EMMA is to use the security's unique identifier, or CUSIP number. Enter the nine-digit CUSIP number in the quick search box in the upper right-hand corner of every page of the EMMA website to get direct access to details on that security.

However, a CUSIP number may not be available or an EMMA user may be interested in any securities that meet certain criteria. EMMA's advanced search helps investors, state and local governments and others quickly and easily locate municipal securities by a broad variety of search criteria.

Security Information Filter

This filter allows users to enter criteria such as state of issuance, maturity date, credit rating and sector.

Trade History Filters

Using this filter will locate securities based on the date, price, yield, amount and type of transaction. More than 70 million trades are visible on EMMA.

Continuing Disclosure Filter

Selecting continuing disclosure filter options will return securities for which certain disclosure documents have been posted to the EMMA website. More than 700,000 disclosure documents are available on EMMA, including official statements, annual financial information and event-based notices. An [online video tutorial](#) provides instructions and tips for using EMMA Search. Visit the EMMA website at emma.msrb.org and click on the Search tab to begin a new municipal security search.

Searching with MyEMMA

MyEMMA enables EMMA website users to tailor and save their advanced searches. Sign up for a MyEMMA profile to create groups of securities to tailor your searches and more quickly find information related to particular securities. MyEMMA also allows users to save frequently used sets of search criteria.

About EMMA®

The Municipal Securities Rulemaking Board (MSRB) provides market transparency through its Electronic Municipal Market Access (EMMA®) website, the official repository for information on all municipal bonds. The MSRB protects investors, state and local governments and other municipal entities, and the public interest by promoting a fair and efficient municipal securities market. Learn more about the mission of the MSRB at msrb.org.

Subscribe to EMMA email updates from the MSRB.
