Introduction

The Municipal Securities Rulemaking Board (MSRB) protects investors, issuers of municipal securities, entities whose credit stands behind municipal securities and public pension plans by promoting a fair and efficient municipal market. The MSRB fulfills this mission by regulating securities firms, banks and municipal advisors that engage in municipal securities and advisory activities. To further protect market participants, the MSRB promotes disclosure and market transparency through its Electronic Municipal Market Access (EMMA®) website, provides education and conducts extensive outreach. The MSRB has operated under Congressional mandate with oversight by the Securities and Exchange Commission since 1975.

The EMMA website is a centralized online database operated by the MSRB that provides free public access to official disclosure documents and trade data associated with municipal bonds issued in the United States. In addition to current credit rating information, the EMMA website also makes available real-time trade prices and primary market and continuing disclosure documents for over one million outstanding municipal bonds, as well as current interest rate information, liquidity documents and other information for most variable rate municipal securities.

This manual, “*Specifications for the EMMA Primary Market Subscription Service*”, contains specifications for the real time, computer-to-computer dissemination of official statements, certain preliminary official statements and advance refunding documents submitted by underwriters under MSRB Rule G-32, as well as similar documents submitted voluntarily by issuers.

Background

The EMMA primary market disclosure service, established as a service of EMMA, receives submissions of official statements (“OSs”), preliminary official statements (“POs”) and related pre-sale documents (“POS-related documents”), advance refunding documents (“ARDs”), and any amendments thereto (collectively, “primary market documents”), together with related indexing information to allow the public and persons engaged in regulating the municipal securities market to readily identify and access such documents, from brokers, dealers and municipal securities dealers (“dealers”), acting as underwriters, placement agents or remarketing agents for primary offerings of municipal securities (“underwriters”).

Submissions made through the EMMA primary market disclosure service accepted during the hours of 8:30 am to 6:00 pm Eastern Time on an MSRB business day are, in general, posted on the EMMA within 15 minutes of acceptance, although during peak traffic periods posting may occur within one hour of acceptance. Submissions outside of such hours often are posted within 15 minutes although some submissions outside of the MSRB’s normal business hours may not be processed until the next business day.

The EMMA subscription service makes available all disclosure documents and related indexing information simultaneously with the posting thereof on EMMA. The EMMA subscription service is provided through a web service accessible by using various commercially available products. Data is streamed, depending on the subscriber’s own software settings, using XML files with embedded or accompanying transmissions of, PDF files of primary market disclosure documents.

The MSRB subscription service is available to paying subscribers subject to a subscription agreement entered into with the MSRB. Subscribers must conform to the terms and conditions of that agreement. In addition, to purchase a subscription it is necessary to provide the MSRB with verification of the appropriate license from CUSIP Global Services. More information about the subscription agreement and license verification are available at www.msrb.org. The MSRB reserves the right to restrict or remove the access of users when their use of the Subscription Service Interface is endangering the integrity of EMMA

and its systems.

EMMA Subscription Service Interface

The MSRB will expose a web service interface to allow subscribers to receive Simple Object Access Protocol (SOAP) standard extensible markup language (XML) messages and portable document format (PDF) documents using secure, computer-to-computer communications. These interfaces will be remotely consumed by applications written by or for subscribers in a wide variety of programming languages and running on a wide variety of platforms. The EMMA Subscription Service Interface exposes the following web service for retrieval of submission data and related files:

Data and Document Retrieval Service:

<https://services.emma.msrb.org/SubscriberServices/EmmaSubscriptionService.svc>

Beta Platform for EMMA Subscription Web Service Interface

Beta access to the subscription web service interface is made available by the MSRB. This serves as a platform for potential and existing subscribers to conduct tests to ensure proper programming and configuration of their applications for accessing the EMMA Subscription Web Service Interface.

Data and documents available through the beta platform are for test purposes only and are not to be re-disseminated or otherwise used by subscribers, other than for purposes of testing programming and configuration of subscription applications.

Access to the beta platform site may require a separate set-up. To inquire about the procedures for accessing the beta platform site, contact MSRB Support at 202-838-1330. The web service interfaces for the beta platform are as follows:

Beta platform for data and document:

Data and Document Feed Process

The EMMA Subscription Web Service Interface will provide XML files of data and PDF files of primary market disclosure documents submitted to the EMMA Submission Service through both the EMMA data submission portal and the automated submission interface.

Data File Dissemination

Each day EMMA receives and publishes data and document submissions from underwriters, placement agents or remarketing agents and their agents. Individual publishing events (“transactions”) will normally be available for subscriber access simultaneously with the posting of publicly disseminated information to the EMMA. Subscribers will first determine which transactions to retrieve by polling the data file subscription web service, at a frequency to be determined by each subscriber, by issuing a data request to receive the current day’s transaction list, based on subscriber-determined parameters¹. Due to the anticipated volume and frequency of submissions, the MSRB recommends polling the subscription service not less frequently than once every 10 minutes and not more frequently than once per minute. To this end, the MSRB reserves the right to establish a maximum polling frequency as it deems appropriate. Subscribers use the list provided to retrieve the corresponding XML data files by issuing an individual data request for each transaction. Throughout the day subscribers will repeatedly request that day’s list of transactions because additional transactions will be added to the day’s list of published transactions as more submission events are processed by EMMA. Subscribers can compare the most recent transaction list against the data previously received to determine which additional transactions have not yet been requested.

Document Dissemination

Documents submitted to EMMA typically will be available for subscriber access simultaneously with the posting of such documents to the EMMA. Subscribers will issue document requests, at a frequency to be determined by each subscriber, to receive any available documents based on the file reference identifiers provided in the XML files disseminated to subscribers. Each document will be transmitted to subscribers as individual PDF files. Depending on the subscriber’s parameters for issuing document requests, subscribers will be able to access documents through the EMMA Subscription Web Service Interface on

¹ Alternatively subscribers may choose to request transaction lists for prior days subject to a look-back window/period maintained by the MSRB consistent with the subscription service agreement. Because transaction dates are determined by the processing date, transaction lists from prior dates will not change. However, the data published for a primary market offering may be updated by transactions published on subsequent dates.

an effectively real-time basis, subject to transmission limitations resulting from the potentially large size of some document files and the speed of the subscriber's connection.

Message Processing, Schemas and Data Tags

This document refers to a series of figures and tables providing more detailed information about the EMMA Subscription Web Service Interface. A message processing overview is included in Figure 1. Information categories and available data tags applicable to each category are included in Figure 2-6.²

Data Message

Data elements to be disseminated through the EMMA Subscription Web Service Interface will be organized in a hierarchical relationship into the following categories: (i) submission data; (ii) offering data; (iii) issue data; (iv) security data; (v) document data; (vi) file data; and (vii) limited offering contact data. These categories, and the available data tags applicable to each category, are shown in Figure 2 and are also summarized below:

- **submission data**
 - (i) submission identifier (uniquely identifies submission being disseminated)
 - (ii) submission type (primary market disclosure, advance refunding disclosure)
 - (iii) submission status (publish, notice of cancellation of offering)
 - (iv) issuer submitted (indicates if data provided by an issuer)
 - (v) submission transaction date and time (indicates EMMA posting date and time)
- **offering data**
 - (i) offering type (bond, municipal fund security)
 - (ii) underwriting spread (if no underwriting spread disclosure indicator used)
 - (iii) underwriting spread disclosure indicator (if underwriting spread not provided – disclosed in official statement, not disclosed for competitive sale)
 - (iv) OS availability status (as applicable – indicates if official statement not available at closing, if no official statement is available and applicable exemption under Rule 15c2-12, if official statement available only from underwriter for limited offering under Rule 15c2-12)
 - (v) POS availability status (if OS availability status used – indicates if preliminary official statement is available or is not available)
 - (vi) CUSIP-9 of latest maturity on issue not underwritten (provided only for offerings where different underwriters underwrite separate issues in the offering)³

² The descriptions of the submission data elements to be provided by submitters to EMMA as described in the MSRB Primary Market Submission Specifications provide more detailed information about the data elements to be disseminated to subscribers through the EMMA subscription service.

³ Note that the MSRB has moved the “CUSIP-9 of latest maturity on issue not underwritten” from the issue data category (as included in the preliminary specifications) to the offering data category (as included in the final specifications).

- **issue data (each element provided for each issue in the offering, as applicable)**
 - (i) issue type (new issue, remarketed, refunded)
 - (ii) security type (CUSIP-9, Non-CUSIP, commercial paper)
 - (iii) issuer name (full name as entered by submitter)
 - (iv) issue description (full description as entered by submitter)
 - (v) issuer state
 - (vi) issue closing date
 - (vii) issue dated date
 - (viii) original dated date (for remarketings if CUSIP-9 is unchanged but new dated date is assigned)
 - (ix) formal award data time
 - (x) first trade execution time
 - (xi) original CUSIP-9 of remarketed security (provided only if new CUSIP-9 number assigned to a remarketed issue)
 - (xii) issuer or other obligated persons have agreed to undertake to provide Continuing Disclosure information as contemplated by Exchange Rule 15c2-12 (enter Yes or No) annual filing will be available on or about (enter Month and Day) or
 - (xiii) annual filing will be available on or about (enter count) of (select Days or Months) after fiscal year ending on (enter Month and Day)
 - (xiv) CUSIP-6 (provided only for commercial paper issue where CUSIP-9s not submitted to EMMA or for Non-CUSIP issues if CUSIP-6 of issuer is known)
 - **security data**
 - (i) CUSIP-9 (as applicable for new issue or remarketed issue type – not provided for municipal fund security issue type or Non-CUSIP or CUSIP-6 security type)
 - (ii) maturity date
 - (iii) security dated date (if different from issue dated date)
 - (iv) maturity principal amount
 - (v) interest rate
 - (vi) initial offering price or yield
 - (vii) initial offering price
 - (viii) Initial offering yield
 - (ix) security status (as applicable if underwriter is only underwriting a portion of an issue – not underwritten indicates that this security is underwritten by a different underwriter, partially underwritten indicates that underwriter is underwriting a portion of this security and the remaining portion is underwritten by another underwriter)
 - (x) par value underwritten (if security is partially underwritten, represents portion of security underwritten by the underwriter)
 - (xi) original CUSIP-9 of refunded security (used only for refunded issue type – not provided for Non-CUSIP or CUISP-6 security type)
 - (xii) new CUSIP-9 of refunded security (used only for refunded issue type if new CUSIP-9 assigned for refunded portion of partially refunded security)
 - (xiii) new CUSIP-9 for unrefunded balance (used only for refunded issue type if new CUSIP-9 assigned for unrefunded balance of partially refunded security)
 - **document data (each element provided for each document associated with the submission, as applicable)**
 - (i) document identifier (uniquely identifies submission being disseminated)
-

- (ii) document type (official statement, preliminary official statement, advance refunding document, remarketing supplement, municipal fund security disclosure document, municipal fund security disclosure document supplement)
- (iii) document description
- (iv) document status (current, archived, removed)⁴
- (v) document posting date (date first file of document posted to public on EMMA)
- (vi) document archive date (date document moved to EMMA archive)
- (vii) document remove date (date document removed from EMMA)
- (viii) CUSIP-9 identifier of refunding issue (only for advance refunding document – provided for each advance refunding issue applicable to such document)
- (ix) original CUSIP-9 of refunded security (only for advance refunding document – provided for each refunded security applicable to such advance refunding document)
- (x) refunding issue closing date
- (xi) refunding issue issuer name
- (xii) refunding issue issue description
- **file data (each element provided for each file of a document, as applicable)**
 - (i) file identifier (unique identifier for each PDF file of the document)
 - (ii) file order (as applicable if multiple files for the document are submitted)
 - (iii) file status (current, archived, removed)
 - (iv) file posting date (date file posted to public on EMMA)
 - (v) file remove date (date file removed from EMMA)
- **limited offering contact (provided only if an official statement for an offering exempt from Rule 15c2-12(d)(1)(i) is produced but will not be submitted to EMMA)**
 - (i) OS contact organization name
 - (ii) OS contact first name
 - (iii) OS contact last name
 - (iv) OS contact title
 - (v) OS contact phone number
 - (vi) OS contact phone number extension
 - (vii) OS contact address
 - (viii) OS contact city
 - (ix) OS contact state
 - (x) OS contact zip code
 - (xi) OS contact email address

⁴ Selection choice “Removed” has been added to the final specifications. The document archive for each issue or security generally will contain all documents submitted to EMMA for public dissemination with respect to such issue or security. In addition to “current” documents posted on their respective Issue Detail or Security Detail page on the EMMA portal, the archive will sometimes include duplicate submissions of documents that may occur from time to time, as well as documents that may be superseded through subsequent amendatory submissions to EMMA. Such superseded documents will be moved from the “current” document list on the Issue Detail or Security Detail page to the “archive” list available to the public through the archive link appearing on such Issue Detail or Security Detail page. In very limited circumstances, a document may be removed altogether from EMMA, in which case the document status would be listed as “removed.”

Several examples of XML files disseminating data submissions for various types of primary market disclosures and advance refunding disclosures are included herein.

Figure 1: Message Processing Overview for the EMMA Subscription Web Service Interface

MESSAGE PROCESSING OVERVIEW

Figure 2: XML Data Tag Structure

The following is a listing of possible data tags that may be included in XML data files depending on the specifics of the disclosure being reported. Relevant data tags for any given data message will depend on the submission type, offering type, issue type and security type.

SOAP (Simple Object Access Protocol) - foundation layer of the web services protocol stack

Figure 3: XML Data Message Category Type Overview

Below are the information categories and allowed values associated with subscription messages. Primary Market Disclosures will consist of offering types “bond” and “municipal fund securities.” Advance Refunding Disclosures will consist of offering type “bond.” Issue and security types are included as appropriate to describe the nature of the offering. Five types of documents will be disseminated to subscribers: official statements, preliminary official statements, municipal fund securities disclosure document and municipal fund securities disclosure document supplements. Normally, a document will consist of a single PDF file. If a document consists of multiple files, each file will be disseminated separately.

Figure 4: Bond Type Structure

If the XML data message contains information about a Primary Market Disclosure and the offering type is bond, the issue type may be new issue or remarketed with the possible security types and document types shown. Although all new issue may be of any of the shown security types, a remarketed issue will only be of type CUSIP-9.

Figure 5: Municipal Fund Security Type Structure

If the XML data message contains information about a Primary Market Disclosure and the offering type is Municipal Fund Security, document type is reported.

Figure 6: Advance Refunding Type Structure

If the XML data message contains information about an Advance Refunding Disclosure the offering type is Bond and the document type will be Advance Refunding Document (ARD).

Data Tag Glossary

Table 1: Data Tag Glossary for EMMA Subscription Service

Below is a glossary of data tags represented in Figure 2 and reported via the EMMA Subscription Web Service Interface. This glossary sets out each data element's XML container, data tag, definition and data specifications, including a listing of possible enumerated values and an example of the data format.

Subscription Data Tags Description and Specification EMMA Subscription Service Interface			
XML Container	Data Tag	Definition	Data Specification
Submission	Submission Type	Indicates base category of disclosure, consisting of primary market or advance refunding disclosure	Enumerated Value: <ul style="list-style-type: none"> • PrimaryMarketDisclosure • AdvanceRefundingDisclosure
	Submission Status	Indicates the intention to publish the information in the EMMA public portal or as official notice of cancellation of the offering	Enumerated Value: <ul style="list-style-type: none"> • Publish • NoticeOfCancellationOfOffering
	Submission Identifier	Unique identifier assigned by EMMA at time of initiation of submission (the initial submission event) and used by the submitter in connection with subsequent submission events	Type= String{Min1,Max25} ex: S212345678910
	Issuer Submitted	Indicates if the data were provided by an issuer	Enumerated Value: <ul style="list-style-type: none"> • Yes • No
	Submission Transaction Date Time	EMMA-assigned date and time the submission was registered in EMMA	Type=ISODateTime (CCYY-MM-DDT00:00:00) ex: 2008-12-01T13:30:00

Response Messages

Table 2: EMMA Subscription Response Messages

EMMA will generally follow the standard published Hypertext Transfer Protocol (HTTP) response status codes when reporting the status of subscription requests. Listed below are typical EMMA response codes, with descriptions based on specific situations, however, other application specific codes may be returned from time to time without prior notice.

Subscription Response Codes EMMA Subscription Web Service Interface	
Response Code	Description
200	OK
400	Request is not parse-able or bad request
401	Authentication Failed
402	The request is outside the look-back window
403	You are not authorized to subscribe to the submission type requested.
404	Not Found - the reference provided is valid
429	Request frequency violation – as applicable
500	System Error
550	Not Found - the file requested is not found
