Introduction

The Municipal Securities Rulemaking Board (MSRB) protects investors, issuers of municipal securities, entities whose credit stands behind municipal securities and public pension plans by promoting a fair and efficient municipal market. The MSRB fulfills this mission by regulating securities firms, banks and municipal advisors that engage in municipal securities and advisory activities. To further protect market participants, the MSRB promotes disclosure and market transparency through its Electronic Municipal Market Access (EMMA®) website, provides education and conducts extensive outreach. The MSRB has operated under Congressional mandate with oversight by the Securities and Exchange Commission since 1975.

The EMMA website is a centralized online database operated by the MSRB that provides free public access to official disclosure documents and trade data associated with municipal bonds issued in the United States. In addition to current credit rating information, the EMMA website also makes available real-time trade prices and primary market and continuing disclosure documents for over one million outstanding municipal bonds, as well as current interest rate information, liquidity documents and other information for most variable rate municipal securities.

The MSRB Short-term Obligation Rate Transparency (SHORT) System is a facility for the collection and dissemination of information and documents about municipal securities bearing interest at short-term rates, which include municipal Auction Rate Securities (ARS) and Variable Rate Demand Obligations (VRDOs).

This document details the procedures for submitting to the SHORT System. Also included in this document are schemas used by the SHORT System to parse XML file submissions. The schemas can be used by SHORT System submitters to verify that XML files are properly formatted. In addition, this document sets forth the data elements that will be used in connection with the XML Interface for the SHORT System.

The MSRB provides a SHORT System Web User Interface for manual input of data to the SHORT System. The SHORT System Web User Interface also displays information submitted by XML as well as any error codes returned on a submission. A separate user manual for the SHORT System Web User Interface is available on www.msrb.org.

Information submitted to the SHORT System is made available on the MSRB’s Electronic Municipal Market Access (“EMMA”) website and on a subscription basis.
SHORT System Overview

The SHORT System is a facility of the MSRB for the collection and dissemination of information and documents about securities bearing interest at short-term rates and making such information and documents publicly available through a dissemination service.

Submissions to the SHORT System

The SHORT System receives submissions of information and documents about securities bearing interest at short-term rates under MSRB Rule G-34(c).

Information and Documents to be submitted: The basic items of information and documents required to be submitted to the SHORT System are the same as those required to be submitted to the MSRB under MSRB Rule G-34(c). Submitters of documents shall provide to the SHORT System related indexing information with respect to each document submitted, including an indication of the document type; date such document became available to the broker, dealer or municipal securities dealer; and CUSIP number(s) of the municipal securities to which such document relates. A submitter required to submit a document that is already available in its entirety in the SHORT System may, in lieu of submitting a duplicate document, identify the document already submitted and provide such items of related indexing information as are required by MSRB rules or the SHORT System input specifications and system procedures. A submitter required to submit a document that is not able to be obtained through best efforts as provided in Rule G-34(c) must provide an affirmative indication that a document required to be submitted is not available for submission notwithstanding the submitter’s best efforts to obtain such document. The complete list of data elements that are required on a submission to the SHORT System is available in input specifications and system procedures made available on www.msrb.org. Submitters shall be responsible for the accuracy and completeness of all information submitted to the SHORT System.

Submitters: Submissions to the SHORT System may be made solely by authorized submitters using password-protected accounts in the MSRB’s user authentication system, MSRB Gateway. Through MSRB Gateway, submitters also have the ability to designate third-party agents to submit information to the SHORT System on the submitter’s behalf.

Submissions may be made by the following classes of submitters:

- ARS Program Dealer
Specifications for the SHORT System Data Submission Services

- VRDO Remarketing Agent
- ARS Auction Agent
- Designated Agent, which may submit any information otherwise permitted to be submitted by another class of submitter which has designated such agent, as provided below.

Submitters may designate agents to submit information on their behalf, and may revoke the designation of any such agents, through MSRB Gateway. Such Designated Agents must register to obtain password-protected accounts through MSRB Gateway in order to make submissions on behalf of the designating submitters. All actions taken by a Designated Agent on behalf of a submitter that has designated such agent shall be the responsibility of the submitter.

The MSRB anticipates that a majority of ARS information will be submitted by ARS Auction Agents. ARS Auction Agents would be allowed to submit information to the SHORT System without prior designation by an ARS Program Dealer. In the event that an ARS Auction Agent submits information about an auction to the SHORT System, an ARS Program Dealer would not also be required to submit information provided that the ARS Program Dealer has been correctly identified on the submission by the ARS Auction Agent. In the event that an ARS Auction Agent fails to submit information about an ARS auction, the ARS Program Dealer would be required to submit the required information about the auction to the SHORT System.

**Timing of Submissions:** Submitters are required to make submissions to the SHORT System within the timeframes set forth in MSRB Rule G-34(c) and related MSRB procedures. Submissions generally are required to be made by no later than 6:30 p.m. Eastern Time on the day that an auction occurs in an ARS or on the day that an interest rate reset occurs for a VRDO. Submissions of information to the SHORT System may be made throughout any RTRS Business Day, as defined in Rule G-14 RTRS Procedures, from at least the hours of 6:00 a.m. to 9:00 p.m. Eastern Time, subject to the right of the MSRB to make such processes unavailable at times as needed to ensure the integrity of the SHORT System and any related systems. Submissions of documents may be made throughout any day, subject to the right of the MSRB to make such processes unavailable between the hours of 3:00 a.m. and 6:00 a.m. Eastern Time each day for required maintenance, upgrades or other purposes, or at other times as needed to ensure the integrity of MSRB systems. The MSRB shall provide advance notice of any planned periods of unavailability and shall endeavor to provide information to submitters as to the status of the submission interface during unanticipated periods of unavailability, to the extent technically feasible.
Method of Submission: Information and documents may be submitted to the SHORT System through a secure, password-protected, web-based electronic submitter interface or through a secure, authenticated computer-to-computer data connection, at the election of the submitter. When making submissions using the web-based interface, related information is entered manually into an online form and documents are uploaded as portable document format (PDF) files. Computer-to-computer submissions utilize XML files for data and PDF files for documents. Appropriate schemas and procedures for web-based and computer-to-computer submissions are available in input specifications and system procedures made available on www.msrb.org.

SHORT System Processing
The SHORT System provides a single portal for the submission of information and documents. The SHORT System, as well as other MSRB systems and services, performs various data checks to ensure that information and documents are submitted in the correct format. In addition, data checks are performed to monitor dealer compliance with MSRB Rule G-34(c) as well as to identify information submitted in correct formats that may contain errors due to information not falling within reasonable ranges of expected values for a given item of information. All submissions generate an acknowledgement or error message, and all dealers that have information or documents submitted on their behalf by either an ARS Auction Agent or a Designated Agent are able to monitor such submissions.

SHORT System Information and Document Dissemination
Information and documents submitted to the SHORT System that passes the format and data checks described above are processed and disseminated on a real-time basis. Any changes to submissions also are processed upon receipt, and updated information and documents are disseminated in real-time. Information submitted to the SHORT System is, in general, disseminated to the MSRB Short-term Obligation Rate Transparency service within 15 minutes of acceptance, although during peak traffic periods, dissemination may occur within one hour of acceptance. Submissions of documents to the SHORT System accepted during the hours of 8:30 a.m. to 6:00 p.m. Eastern Time on an MSRB business day are, in general, disseminated to the SHORT service within 15 minutes of acceptance, although during peak traffic periods posting may occur within one hour of acceptance. Submissions outside of such hours often are posted within 15 minutes although some submissions outside of the MSRB’s normal business hours may not be processed until the next business day. SHORT System information and documents, along with related indexing information, shall be made available to the public through the EMMA website for the life of the related securities.
The MSRB provides a real-time data feed subscription service of interest rate data elements and related documents submitted to the SHORT System.

Normal System Hours

Submissions of information to the SHORT System may be made throughout any RTRS Business Day, as defined in Rule G-14 RTRS Procedures, from at least the hours of 6:00 a.m. to 9:00 p.m. Eastern Time, subject to the right of the MSRB to make such processes unavailable at times as needed to ensure the integrity of the SHORT System and any related systems. The MSRB shall provide advance notice of any planned periods of unavailability and shall endeavor to provide information to submitters as to the status of the submission interface during unanticipated periods of unavailability, to the extent technically feasible.

SHORT System Registration

Submissions to the SHORT System may be made solely by authorized submitters using password-protected accounts in MSRB Gateway. Submitters of information to the SHORT System are required to obtain an account in MSRB Gateway in order to submit information to the SHORT System. Through MSRB Gateway, submitters also have the ability to designate third-party agents to submit information to the SHORT System on the submitter’s behalf.

Submissions to the SHORT System may be made by the following classes of submitters:

- ARS Program Dealer
- VRDO Remarketing Agent
- ARS Auction Agent
- Designated Agent, which may submit any information otherwise permitted to be submitted by another class of submitter which has designated such agent

User Account Management System

MSRB has assigned a master MSRB Gateway account to each dealer and each account is administered by the dealer’s Primary Contact under MSRB Rule G-40, on electronic mail contacts. Each dealer controls the administration of its master account and is able to create and manage individual user accounts within MSRB Gateway. Dealers can also appoint account administrators to assist with managing user profiles
and account access rights. Accounts in MSRB Gateway will be created by MSRB staff for each ARS Auction Agent.

**Agent Invitation and Designation System**

MSRB Gateway allows submitters to designate third-party agents to submit information to the SHORT System on their behalf. To designate an agent through MSRB Gateway, submitters send “invitations” to third-parties to act as Designated Agents. MSRB Gateway transmits these invitations by email to the third parties, and upon receipt, the third party can create their own accounts in MSRB Gateway if they are not already registered users. These third parties can then accept submitter invitations through MSRB Gateway.

Submitters can also electronically confirm Designated Agents through MSRB Gateway before such Designated Agents begin making submissions to the SHORT System. Once confirmed by a submitter, a Designated Agent can log into MSRB Gateway to make electronic submissions on behalf of the designating submitter. Submitters will be responsible in all respects for actions taken by Designated Agents on their behalf. MSRB Gateway will also allow submitters to revoke designations of Designated Agents at any time.

Once a Designated Agent has been established as a recognized company in MSRB Gateway, the Designated Agent will utilize the User Account Management System as described above.

**ARS Auction Agent and Program Dealer Submissions**

ARS Auction Agents are allowed to submit information about an ARS to the SHORT System without prior designation by an ARS Program Dealer. In the event that an ARS Auction Agent submits information about an auction to the SHORT System, an ARS Program Dealer would not also be required to submit information provided that the ARS Program Dealer has been correctly identified on the submission by the ARS Auction Agent. In the event that an ARS Auction Agent fails to submit information about an ARS auction, the ARS Program Dealer is required to submit the required information about the auction to the SHORT System. Note that if there are multiple ARS Program Dealers associated with an auction for which an ARS Auction Agent fails to submit information about the auction to the SHORT System, ARS Program Dealers would only be allowed to report their own identity on an ARS submission unless another ARS Program Dealer has designated the submitting ARS Program Dealer to submit information to the SHORT System on its behalf through MSRB Gateway.
If there are more than one ARS Program Dealers associated with an auction and the ARS Auction Agent has not submitted the required information, the information about the ARS auction submitted by the first ARS Program Dealer to submit information to the SHORT System is disseminated. Upon receipt of additional submissions of information about the same ARS auction from other ARS Program Dealers, those dealers’ identities would be added to the information about the ARS auction; however the other information required to be submitted will continue to reflect the information submitted by the first ARS Program Dealer to submit information. Submissions of information by an ARS Auction Agent supersede information submitted by another class of submitter, with the exception of the identities of ARS Program Dealers, even if an ARS Program Dealer has already submitted information about the ARS auction.

**Data Elements**

This section sets forth the data elements that will be used in connection with the XML interface for the SHORT System. The data elements are listed in tables that have the following columns. The order of the data elements in these tables does not necessarily represent the order of the fields in the XML-formatted file.

<table>
<thead>
<tr>
<th>Column Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field Name</td>
<td>English name of the data element</td>
</tr>

</tbody>
</table>

* Note that null or blank is a valid value for these fields, thus these fields are “not required” for a submission to be processed by the SHORT System; however, Rule G-34 requires that these fields be populated with a value when a value applies. For example, if a maximum rate is specified in official documents for an ARS or VRDO, the maximum rate is required to be included in a submission.

<tr>
<td>Aggregate Par Amount – Investors and Remarketing Agent</td>
<td>Par amount of the VRDO, if any, held by parties other than a liquidity provider, which represents the aggregate par amounts held by the VRDO Remarketing Agent and by investors. This value reflects information available to the VRDO Remarketing Agent as of the date and time of the interest rate reset.</td>
</tr>
</tbody>
</table>
SHORT System Error Codes

The SHORT System performs various data checks to ensure that information submitted is in the correct format. In addition, data checks are performed to monitor compliance with MSRB Rule G-34(c) as well as to identify information submitted in correct formats that may contain errors due to information not falling within reasonable ranges of expected values for a given item of information. Note that the data checks performed are subject to change.

Format Edits
Each submission, which may contain more than one “transaction” representing, for example, a report of a VRDO interest rate reset, is reviewed by the SHORT System to verify that its format as well as the format of each transaction is correct. This involves checking various required data elements to ensure that they are present in the correct form (e.g., dates are in date format) and with the correct number of digits or characters. Submissions that fail these edits are not processed further and must be resubmitted in the correct format in order for the submission to be processed by the SHORT System. Transactions receiving a format edit error code also must be resubmitted in the correct format in order for the transactions to be processed by the SHORT System. Beginning September 27, 2010, for submissions containing multiple transactions, the SHORT System will accept all transactions that do not receive a format error code and only those transactions receiving a format error must be resubmitted in the correct format.

The SHORT System only accepts information from parties known to the MSRB. In addition, information submitted by a Designated Agent on behalf of a dealer or ARS Auction Agent is only accepted if such dealer or ARS Auction Agent for whom the Designated Agent is submitting information has previously been so designated by the dealer or ARS Auction Agent. Submissions by parties that are not known to the MSRB or by a party for whom a dealer or ARS Auction Agent has not designated as a Designated Agent receive a format edit error code and such information must be resubmitted by a party known to the MSRB or by a Designated Agent.

Content Edits
The values in submissions of data to the SHORT System that pass all format edits are checked to determine that they are within reasonable limits. Transactions receiving a content edit error code must be reviewed to check that the information was correctly reported. If the information was correctly reported, no further action is required; however, any erroneous information must be corrected by either modifying the
information or cancelling and resubmitting a correct report. Corrections must be made as soon as possible.

**Error Code Tables**

Listed below are all of the error codes that could be returned in response to a submission to the SHORT System. For each error code, a short description is provided as well as an indication of whether each error code applies to instruct, modification or cancellation as well as whether each error code applies to a report of an ARS or VRDO.

SHORT System Submission Feedback

All submissions processed by the SHORT System generate an acknowledgement or error message. Each transaction within a submission also receives an acknowledgement or error message. In addition, all dealers that have information submitted on their behalf by either an ARS Auction Agent or a Designated Agent will be able to monitor such submissions in real-time, once such submissions have passed all format edits processed by the SHORT System.

Feedback Delivery

All submissions and transactions within a submission to the SHORT System are assigned an acknowledgement or error code. Such information is available by the following means:

Electronic Feedback: All submitters that submit information to the SHORT System using XML receive a response message by XML. (See section XII for the Submitter Response XML schema.)

SHORT System Web User Interface: All submitters, as well as any party for whom information has been submitted on its behalf, may view submissions and any error codes returned using the SHORT System Web User Interface. A separate user manual for the SHORT System Web User Interface is available on www.msrb.org.
SHORT System Web Service

Submissions of information to the SHORT System using a computer-to-computer connection are made by transmitting a properly formatted XML file to the SHORT System Web Service.

Separate web services are used for submitting information to the SHORT System pursuant to Rule G-34 (“SHORT System Production Environment”) or for making test submissions (“SHORT System Test Environment”). The web services are at the following locations:

SHORT System Production Environment:
https://short.msrb.org/msrb_avts_ws/services/avts_submitter_services?wsdl

SHORT System Test Environment:
https://shorttest.msrb.org/msrb_avts_ws/services/avts_submitter_services?wsdl

Submissions of information to the SHORT System using the Web Service to satisfy the requirements of Rule G-34 must be made using the SHORT System Production Environment web service.

XML Message Schemas

Detailed below are SubmitterInput, SubmitterQuery, SubmitterResponse and Common input schemas.
SubmitterInput.xsd
