

EMMA[®] Trade Monitor

The Municipal Securities Rulemaking Board's Electronic Municipal Market Access (EMMA) website features a no-cost resource that allows state and local governments to quickly and easily download into a spreadsheet key data on the price, yield and amount of the secondary market trade activity of their municipal bonds. The EMMA Trade Monitor provides state and local governments with the capability to analyze data from the EMMA website in support of, among other things, evaluating pricing for new issues.

About EMMA[®]

The Municipal Securities Rulemaking Board (MSRB) provides municipal market transparency through its Electronic Municipal Market Access (EMMA[®]) website, the official repository for information on all municipal bonds. The MSRB protects investors, state and local governments and other municipal entities, and the public interest by promoting a fair and efficient municipal securities market. Learn more about the mission of the MSRB at msrb.org.

EMMA[®] Trade Monitor

A tool available on the EMMA website at emma.msrb.org allows state and local governments to quickly and easily download into a spreadsheet key data on the price, yield and amount of the secondary market trade activity of their municipal bonds.

The EMMA Trade Monitor is a no-cost resource for state and local governments offered as part of the MSRB's online Issuer Toolkit. The Issuer Toolkit includes videos, fact sheets and guides about the process of issuing municipal bonds and using the EMMA website.

Track Bond Activity and More

The EMMA Trade Monitor enables state and local governments to export trade data from the EMMA website to a desktop spreadsheet application for analysis of the activity of bonds in the secondary market. State and local governments can use the downloaded data to analyze the prices, yield and amount of secondary market trade activity of municipal bonds

in support of, among other things, evaluating pricing for their new issues. The EMMA Trade Monitor provides trade activity data for a period of up to one year. Trade data is available on trades occurring since January 2005.

Exporting Trade Data

The EMMA Trade Monitor is available only to state and local governments that have set up an organization account and use this account to log in to EMMA Dataport. The EMMA Trade Monitor is accessed through the EMMA Dataport link located in the upper right corner of the EMMA website.

For more information about how to begin using the EMMA Trade Monitor to generate spreadsheets of data on the secondary market trade activity of municipal bonds, refer to the [EMMA Trade Monitor Instructional Guide](#).

Users of the EMMA Trade Monitor must agree to the MSRB's terms and conditions to access the tool.
