

Using EMMA®'s Map-Based Search

The MSRB's [Electronic Municipal Market Access \(EMMA®\) website](#)

enables users to browse a comprehensive directory of state, city, county and other municipal securities issuers in a particular state. Each issuer has a unique

homepage that consolidates all information about that issuer's municipal securities. Explore the issuer homepages by navigating to a particular state from the interactive map on EMMA's homepage.

✓ Consolidated View of Municipal Securities Information

Issuer homepages provide investors with a centralized view of trading activity, official statements, continuing disclosures and refunding escrows for all municipal securities of an issuer. To ensure investors can quickly and easily locate their information, issuers can change the default abbreviated name of their page to their preferred plain-English name.

✓ Customized Issuer Information

Issuers can further customize their homepage to provide contact information for the individual responsible for handling investor inquiries. Customized issuer homepages may also include links to websites with more information for investors.

✓ Finding Issuer Homepages

Start from the interactive map on EMMA's homepage. Select a state to view a list of issuers located in that state.

Browse the list of issuers or use the keyword search to find a specific issuer. Users can also narrow the list to view only state, city, county or other types of issuers. Customized issuer homepages are labeled and listed first to assist users in exploring this feature.

✓ Questions and Comments

For questions and comments about EMMA's issuer homepages, contact MSRB Support.
